

Annual Report

April 17 – Mar 18

Centre for Environment and Agricultural Development (CEAD)

Regd.Address

No: 72, Nallavadu Road , Thavalakuppam, Pondicherry - 605007

CEAD is a Social service Voluntary Organization engaged in the development of farming communities particularly women and landless labourers through training them in environmentally sustainable income generation activities, introducing micro credit schemes and by improving their access to quality education and health services.

Vermi compost training:

The main objective of the organization is to promote sustainable agricultural practices for which vermi compost play pivotal role. Vermicompost is organic manure produced from the decomposable wastes and cow dung. It is easy to prepare, has excellent nutrient promoting properties and absolutely harmless to plants. As most of the reclamation process involves application of bio-manure for sustainable agricultural practices and also to restore the soil

properties, now there is a constant demand for the vermi compost. Compost application increases the organic matter content in the soil and Soil pH is also altered. Producing vermi compost would be an alternate income generation activity for the landless and women. CEAD periodically conducts training to the landless women through experienced staffs helping them to learn the technology. During the current financial year nearly 126 members were given training and more than 24 members had been involved in production and we have arranged market for the producers. These producers were linked with the Dept of Agriculture, Horticulture division, Govt of Pondicherry for getting incentives for the production.

Mushroom Production Training

READY TO FRUIT (RTF) BAGS- A NOVEL CONCEPT TO ENHANCE HOUSEHOLD NUTRITION THROUGH OYSTER MUSHROOMS Mushrooms are good for your health. They contain few calories, but are rich in fibres, vitamins and minerals.

CEAD has given Mushroom Production training to 60 members . 5 were started spawn production unit.

Organic Farming Awareness:

Agriculture - the backbone of our economy is being exploited through chemical usage and improper water management. This programme aims at increasing the capacity of the farmers in developing new methodologies and water management skills. As part of this programme, training is provided on integrated farming system and non-chemical farming. In integrated farming system the various crops and allied activities are explained and some farmers are in the process of developing IFS in their farm. In Organic farming, training is provided on usage of bio fertilizers and Bio pesticides that build and improve the soil content without disturbing nature so that future generation will not be ruined. Also training is given on preparation of Effective Microorganisms, Panchagavyam, Vermiwash, Azolla culture and some trials are being conducted in the farmer's field on research basis. Other than this training to School students and Agricultural College students is also given related to organic farming and IFS. During this financial year 360 farmers and students were given training on organic farming practices. 60 students from PAJANCOA &RI, KARIAKAL has been visited to the FARM at Thavalakuppam for exposure of Integrated Farming system.

Soil Health Management

To enhance the soil health through natural way CEAD trained 60 SHG Members for Preparation of Bio inputs . 1 groups were started production under the name of Green Day and CEAD created the backward linkages for marketing.

Health and nutritional programme:

The people in the targeted villages facing many health hazard due to the bad drainage system, poor nutritional foods, and unsafe drinking water. Therefore 6 health camps and nutritional programme by establishing Home garden were conducted in the targeted villages to create awareness on health hygiene. In addition importance of quality and nutritional foods were explained to the women members from self-help groups.

SHG Development:

We guide in forming self help groups and insist that they should meet regularly, take its own decisions and maintain its own record and direct SHG's towards planning and organizing their activities. We make them realize that are association of people formed to attain certain collective goals. Also mobilizing funds for the groups is also taken care by linking them with banks. Internally they have their monthly contribution and externally banks show keen interest to provide loans to SHG's as they take a collective responsibility to repay the loan without fail. So far, 130 self-help groups were formed in our working area of Pondicherry and Tamil Nadu.

250members has been digitally litrated through certified programe under National Digital Literacy Mission (NDLM)

TREE PLANTING

CEAD main objective is eco friendly activities . On this we have planted 250 trees in and around Pondicherry includes some of the schools.

AGRO TOURISIM

CEAD has developed the farm into agro tourism which includes for eco friendly day to day

life style like ride in bullock cart, having welcome drinks using herbs, traditional games, foods etc. This will be good model for traditional life style systems which students, and tourists can learn and enjoy.

This year nearly 60 visitors have been visited to the farm.

STUDENTS INTERNSHIP PROGRAMME

Agro Industrial tie up programme is a part of course in final year of B. Sc Agriculture. Here the students will put up in different organization for 15 days period and learn by doing and involving in the programme of the Organization. CEAD is giving training to students from different Agriculture College from Pondicherry and Tamil Nadu every year.

This year CEAD trained 60 students of final year B.Sc. Horti from ANNAMALI UNIVERSITY as NGO Attachment programme has been trained on Food processing & Marketing and Agro Industrial link.

EXHIBITION ARRANGEMENTS AND FARM FESTIVAL
